Seeking Product Engineering and Forward Deployed Engineering Roles
832 282 5093 | mollymchen@gmail.com | [LinkedIn](#) | [Website](#) | [GitHub](#) | Seattle, WA

SKILLS

AI: AI-assisted development (Local AI, Claude Code), Rapid prototyping, Agentic AI, RPA | **Cloud & Infra:** Azure, AWS, GCP, Kubernetes, Docker
Integrations: Telescope, Nylas, Zendesk, Tray.ai, Salesforce | **Frameworks:** React, Angular, Vue | **Languages:** Python, C#, Java, TypeScript

EXPERIENCE

OCTAVE — Therapy practice offering behavioral health care to clients across 30+ states Seattle, WA
Product Manager, Internal Tools & Provider Experience Feb 2024 – Present

- Designed and launched a consolidated Google Calendar scheduling system using Cobalt RPA and the Nylas Calendar API, reducing schedule management effort by 75%, increasing provider availability by 1.5× to support 200 additional quarterly bookings and \$2M ARR, while mitigating scheduling conflicts for 9K clients without follow-up appointments.
- Led the design and launch of a database supporting provider biographies on client booking pages (150K+ monthly visits), ingesting 50+ data fields to generate 15k provider bios weekly, and serving consumer requests at 99.9% availability.
- Reduced provider onboarding time by 25% and saved \$600K annually by auditing 10+ software systems, deprecating 3 of them, and replacing them with Telescope CRM and Zendesk AI chatbot in partnership with Clinical Operations and Credentialing.
- Built an end-to-end provider onboarding pipeline for Octave's B2B2C partnership with Cigna using Telescope CRM, Tray.ai agentic workflows, and Descope authentication, supporting 10K eligible providers and reducing manual work by 50%.

MICROSOFT — Azure Commercial Marketplace Seattle, WA
Technical Program Manager II Oct 2022 – Jan 2024

- Mitigated \$65M in annual revenue loss by leading adoption of the Commerce Manifest declarative API for all Azure teams to efficiently submit pricing updates and avoid undercharging B2B customers.
- Developed and operationalized an Azure-wide S360 KPI to track Commerce Manifest adoption by team. Oversaw successful KPI implementation for 30 Azure teams and resolved 3,000+ pricing discrepancies. Wrote inaugural technical documentation for Commerce Manifest.
- Empowered Engineering to exceed monthly OKRs for reliability and performance in our price-publishing engine. Maintained > 99.99% API reliability and all APIs in SLA to publish pricing changes within 3 business days.

MICROSOFT — Azure Commercial Marketplace Seattle, WA
Software Engineer II Aug 2019 – Oct 2022

- Developed Angular components for 30+ Microsoft tenants for the Azure Marketplace pricing tool, managing \$4B worth of first-party Microsoft products. Wrote the team's first-ever server-side UX documentation to help new team members onboard.
- Slashed most-used page load time by 75% by optimizing C# .NET query performance and adding 10 new alerts in Azure Application Insights to detect performance anomalies.
- Created an end-to-end Azure pre-production environment to run a test harness to catch defects before they reach production.
- Drove cross-collaboration with Shanghai team to migrate all price-publishing services from Azure Cloud Services to Azure Kubernetes in 3 months. Created documentation to guide the team through Docker and YML setup, deployment, and testing.
- Implemented certificate auto-rotation for all 6 services to reduce the number of high severity on-call incidents by 25%.

MATCHA — AI-therapist matching platform Seattle, WA
Lead Technical Consultant (part-time) Nov 2021 - July 2022

- Onboarded team to Docker, Heroku PAAS, Github CI/CD, and AWS (IAM and S3), in preparation to migrate to AWS PAAS.
- Transitioned from Squarespace to a responsive React-Django MVP within 6 months, securing \$0.25M in seed funding. Used by a network of 50 therapists, serving over 100 patients and generating \$50k annual earnings.
- Led weekly tech syncs with CEO, engineering, design, data and PM team and provided insight for key early-stage business decisions (storage, compliance, devops infrastructure, security).
- Collaborated with other early-stage startups to make foundational decisions related to scalability, efficiency, and privacy.

EDUCATION

DUKE UNIVERSITY Durham, NC
Bachelor of Science, Major in Computer Science, Minor in Psychology 2015 – 2019
