Seeking Product Engineering Roles

832 282 5093 | mollymchen@gmail.com | [LinkedIn](#) | [Website](#) | [GitHub](#) | Seattle, WA

SKILLS

AI: AI-assisted development (Claude Code, Cursor, Codex, Ollama), Agentic AI (LangChain Fleet, LangSmith Deep Agents, Tray.ai), Rapid prototyping
Cloud & Infra: Azure, AWS, GCP, Kubernetes, Docker | **Frameworks:** React, Angular, Vue | **Languages:** Python, C#, Java, TypeScript
Integrations: Telescope, Airtable, Zendesk, Salesforce | **Data:** SQL, PostgreSQL, Tableau, Hex, Mixpanel, Iterable

EXPERIENCE

OCTAVE — Therapy practice offering behavioral health care to clients across 30+ states

Seattle, WA

Product Manager, Internal Tools & Provider Experience

Feb 2024 – Present

- Designed and launched a unified scheduling system using Cobalt RPA and Nylas Calendar API for Google, reducing schedule management effort by 75%, increasing provider availability by 1.5× to drive \$2M in ARR, and mitigating scheduling conflicts for 9K clients without follow-up appointments. [Project Link](#)
- Built an end-to-end provider onboarding pipeline for Octave's Cigna partnership using Tray.ai low-code agentic workflows and Telescope CRM, supporting 10K providers while cutting manual operational toil by 50%. [Project Link](#)
- Technical lead for the provider database (150K+ monthly visits), migrated business logic from a monolithic service into a new SQL schema to ensure 99.9% availability for 15K providers listed on insurance directory booking pages. [Project Link](#)
- Automated provider onboarding workflows via Zendesk AI Chatbot and Telescope APIs, reducing provider onboarding time by 25%, cutting \$600K in annual software licensing costs, and eliminating 100+ hours of monthly operational toil. [Project Link](#)

MICROSOFT — Azure Commercial Marketplace

Seattle, WA

Technical Program Manager II

Oct 2022 – Jan 2024

- Mitigated \$65M in annual revenue loss by leading adoption of the Commerce Manifest declarative API for all Azure teams to efficiently submit pricing updates and avoid undercharging B2B customers.
- Developed and operationalized an Azure-wide S360 KPI to track Commerce Manifest adoption by team. Oversaw successful KPI implementation for 30 Azure teams and resolved 3,000+ pricing discrepancies. Wrote inaugural technical documentation for Commerce Manifest.
- Empowered Engineering to exceed monthly OKRs for reliability and performance in our price-publishing engine. Maintained > 99.99% API reliability and all APIs in SLA to publish pricing changes within 3 business days.

MICROSOFT — Azure Commercial Marketplace

Seattle, WA

Software Engineer II

Aug 2019 – Oct 2022

- Service owner for 2 big-data ingestion services that manage \$4B+ in first-party commercial product revenue. Developed Angular components for 30+ Microsoft tenants for the Azure Marketplace pricing tool.
- Slashed most-used page load time by 75% by optimizing C# .NET query performance and adding 10 new alerts in Azure Application Insights to detect performance anomalies.
- Created an end-to-end Azure pre-production environment to run a test harness to catch defects before they reach production.
- Drove cross-collaboration with Shanghai team to migrate all price-publishing services from Azure Cloud Services to Azure Kubernetes in 3 months. Created documentation to guide the team through Docker and YML setup, deployment, and testing.
- Implemented certificate auto-rotation for all 6 services to reduce the number of high severity on-call incidents by 25%.

MATCHA — AI-therapist matching platform

Seattle, WA

Lead Technical Consultant (part-time)

Nov 2021 - July 2022

- Onboarded team to Docker, Heroku PAAS, Github CI/CD, and AWS (IAM and S3), in preparation to migrate to AWS PAAS.
- Transitioned from Squarespace to a responsive React-Django MVP within 6 months, securing \$0.25M in seed funding. Used by a network of 50 therapists, serving over 100 patients and generating \$50k annual earnings.
- Led weekly tech syncs with CEO, engineering, design, data and PM team and provided insight for key early-stage business decisions (storage, compliance, devops infrastructure, security).
- Collaborated with other early-stage startups to make foundational decisions related to scalability, efficiency, and privacy.

EDUCATION

DUKE UNIVERSITY

Bachelor of Science, Major in Computer Science, Minor in Psychology

Durham, NC

2015 – 2019
